WELL CONTROL SCHOOL RECEIVES IWCF ACCREDITATION FOR SYSTEM 21 E-LEARNING DRILLING COURSE

January 11, 2016 (Houston, Texas) – Well Control School (WCS), a leading provider of accredited well control training, announced today it received accreditation from International Well Control Forum (IWCF) for its System 21 e-Learning Drilling course.

The IWCF System 21 e-Learning Drilling course is a level 2 basic well control course that uses interactive tasks and role-play scenarios to familiarize the learners with well control concepts while emphasizing proper procedures and teamwork. The course is available in surface and combined surface/subsea stack designations, and imperial and metric unit measurements. The course is designed for drilling and well servicing personnel, consultants, asset managers, engineers and wellsite support personnel. This self-paced course takes 16 hours to complete. Upon successful completion of the course material and a passing test grade, learners will receive the IWCF level 2 certification and 1.6 CEU.

“The System 21 drilling course has been well-received by our customers,” says Ed Geissler, president of Well Control School. “As a global oil and gas training provider, the e-learning IWCF accreditation helps us provide the latest knowledge and expertise to the international oil and gas community through a proven learning format that is available twenty-four hours a day, every day.”

In addition to its IWCF accreditation, the course has IADC WellSharp™, Well Control School and International Association of Continuing Education and Training (IACET) accreditations.

System 21 e-Learning courses are available at www.wcsonlineuniversity.com.

About WELL CONTROL SCHOOL: Since 1979, International Training Services dba Well Control School (WCS) has designed and delivered accredited well control training products and services to the global oil and gas industry. Training curricula includes The Well Control School, International Well Control Forum (IWCF), and International Association of Drilling Contractors (IADC) WellCAP®/WellSharp™ accredited courses in drilling, workover/completion, snubbing, wireline and coiled tubing operations with instructor-led and System 21 e-Learning delivery formats. Well Control School is accredited by the International Association for Continuing Education and Training (IACET) and is authorized to issue the IACET CEU. In addition, WCS is ISO 9001 certified.
